

# HEY YOU

HEY HEY YOU! HEY

Welcome guys to the crazy Lady Dentist Brush  
Pop some toothpaste on me, start the tap and don't be in a rush!  
Are you ready now? It's state of mind, lets do it right,  
We're gonna pump and grind to make them extra 'pearly' white

To the left side, outsides, insides, biting surface  
A circular movement's best for this purpose  
To the right now, with teeth together, round and round  
Do the biting surface so the hidden bits can be found

Brush the outsides, getting right to the back  
Is the only way that you will remove all the plaque  
Give the brush a rinse but then turn off the tap  
Don't waste the water while you're brushing to the rap!

Hey you, you make me feel so good  
Yeh you, just like I knew you would  
I would thank you if I could!  
Coz now I'm brushing like I should!

Hey! Hey you!

And now do the front teeth, remember brush the gums too  
Massaging action, stretch the lips - which may be hard for some of you!  
Rinse the brush before we go again and take a little spit  
Is the brush all nice and clean and ready for the second bit?

To the left again, top inside surface first remember  
Stains behind front teeth are where they're usually the worst  
To the right now from back to front, inside surface move along  
Rotate the brush against the teeth, as we do the brushing song

Hey you, you make me feel so good  
Yeh you, just like I knew you would  
I would thank you if I could!  
Coz now I'm brushing like I should!

Hey! Hey you!

Now do the lower left, inside under the tongue  
Move across inside bottom right, hey now we're nearly done  
Last of all we do behind the front ones now  
The backs of the front teeth, now get the brush in somehow!

I'm saying don't forget the backs of the front six teeth!  
Brush along the gum line to stop the bugs from growing underneath  
One more time, do the back teeth on the left first  
Now the back right, it feels so fresh it's gonna burst!

Use the brush head and set the teeth ablaze  
Make the teeth white while the stains erase  
Use the brush head and set the teeth ablazing  
Now they're so bright it's just amazing!

Inside lowers at the back and one last wiz across the front  
Now try and tell me guys that ya mouth does not feel different  
You can stop now yeh coz the job is all done  
Lady Dentist helps ya brushing coz it makes it more fun!
